					44	189 5/8"	184 1/8"	25 7/8"	46

- There are 37 widths available for a single stack; each at a 4" increment.
- **The stacking widths are estimated measurements:
 - Give or take 13/16" variance for single shades with one standard wand (Left Stack or Right Stack)
 - Give or take 1 7/8" variance for single shades with an additional wand option

					43	184 1/8"	180 1/8"	26 1/2"	45
					44	188 1/8"	184 1/8"	26 15/16"	46

- **Side by Side:** two individually operated shades joined together (suitable for very large windows)
- There are 37 widths available to combine as Side by Side shades; not available as single tracks
 - Track widths 95 7/8" and over will be spliced at the center with SmartJoint™. Side by side shades will still include gaps at the center where the 2 headrails are combined.
- **The stacking widths are estimated measurements:
 - Give or take 13/16" variance for each shade with one standard wand (Left Stack or Right Stack)
 - Give or take 1 7/8" variance for each shade with an additional wand option

Center Gaps

- Gap when vanes are open:
 - When both track widths are less than or equal to 75 5/8", the gap is 1 1/2"
 - When one track width is less than or equal to 75 5/8" but the other is between 79 7/8" to 139 7/8", the gap is 1 3/4"
 - When one track width is less than or equal to 75 5/8" but the other is greater than or equal to 144 1/8", the gap is 2"
 - When both track widths are between 79 7/8" to 139 7/8" each, the gap is also 2"
 - When one track width is between 79 7/8" to 139 7/8" but the other is greater than or equal to 144 1/8", the gap is 2 1/4"
 - When both track widths are greater than or equal to 144 1/8", the gap is 2 1/2"
- There is no gap when fabric vanes are closed
- To minimize the gap, the wands will be attached behind the fabric vanes.

Wands at the center will be behind fabric vanes to minimize gaps.
